Installation Guide

Package Included

(A) Parts Included

(B) Attachment Screw Set

B.

M5x12 mm
(x4)

(C) Tools Needed for Assembly

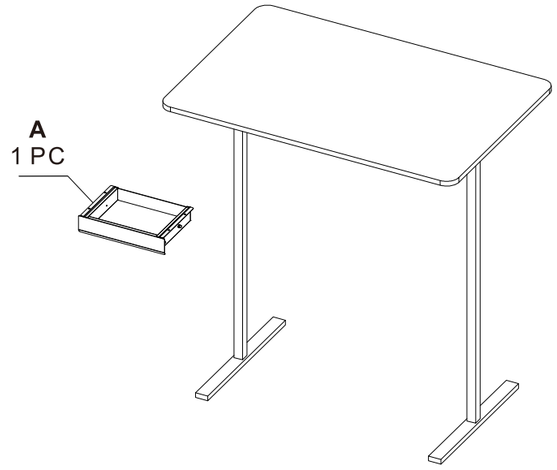

Installation Steps

STEP 1

Set the drawer under your desk, approximately even with the front edge, to assess its placement before attaching it.

Note:
You may perform this step yourself during desk assembly and it is inverted or upside down. If your desk is already upright, ask someone for some help.

STEP 2

Make pilot holes in the desk with a drill. Hold one screw up close to the edge of the desk before inserting it. Ensure that it is not too long and that you do not drill too much into the desk. Have someone hold the drawer in place while you insert four screws (B) into the pilot holes and twist them all the way down.
